

The Poverty and Environment Partnership (PEP)

Now focusing on:

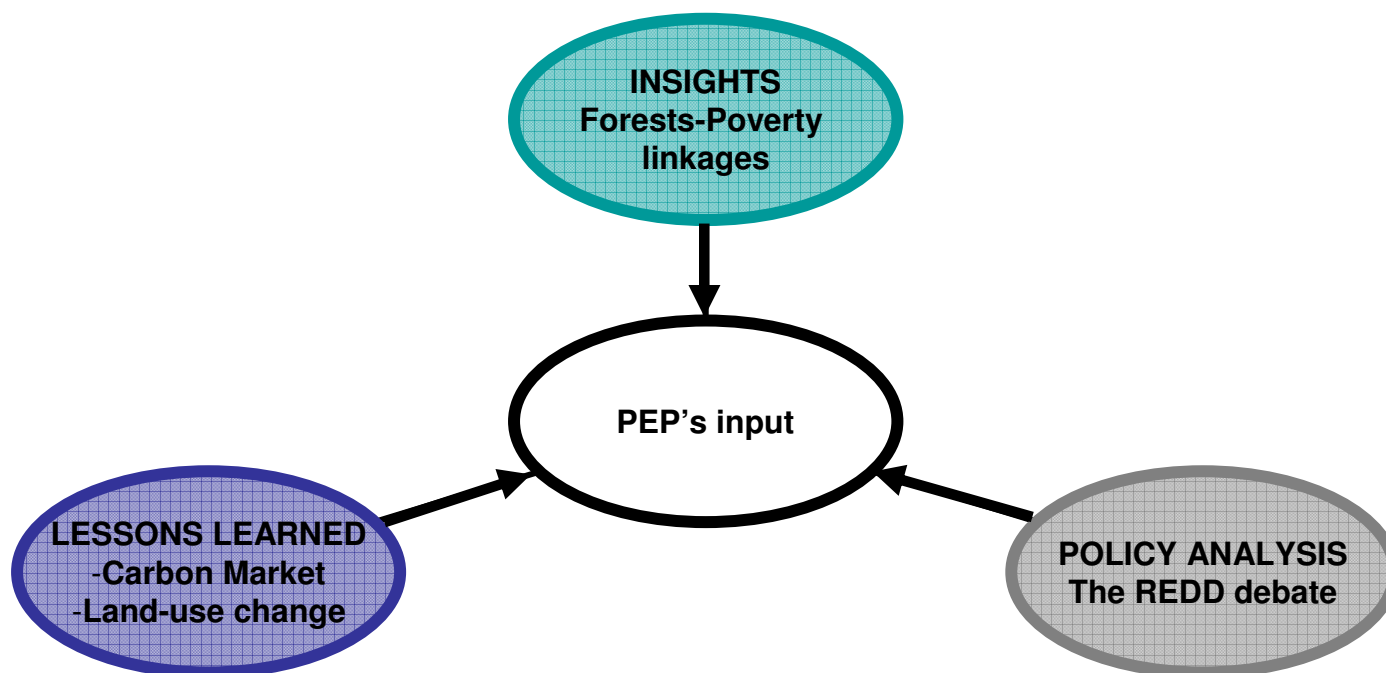

« Infrastructure, growth & poverty reduction: the role of ecosystems and natural resources »»

REDD

- Opportunities
- Risks
- ***Pro-poor?***

PEP's input to Bali

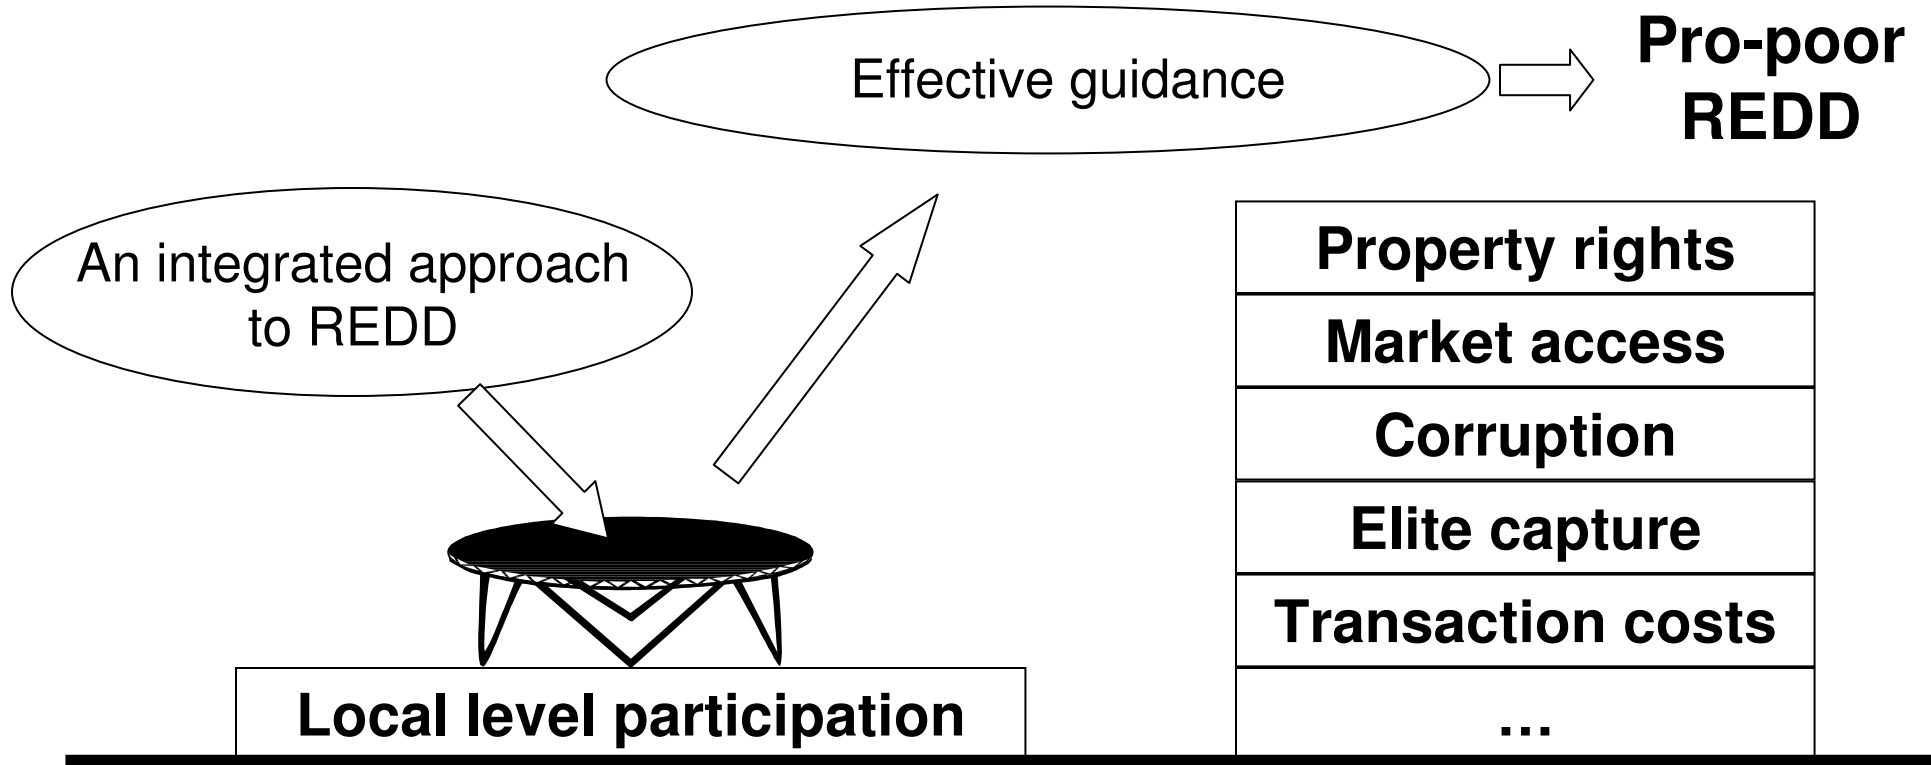

Preliminary findings

- **Lessons Learned** –
 - Poor track record (CMD, Costa Rica PES)
 - New opportunities (community forestry, CCBA standards)
- **Insights** –
 - Complex and ambiguous forest-poverty linkages
 - Marginalization a recurrent issue
- **Policy Analysis** –
 - REDD a moving target
 - New governance structures are needed

Overcoming barriers

Towards pro-poor REDD

- **What kind of:**
 - **Integrated approach?:** How to maximize efficiencies (political, institutional, financial, technical)?
 - **Guidance?:** What social standards for REDD?
